01 — ABOUT

Three bios.

Use the one that fits.

25 WORDS

Neil Rayarao is the co-founder and CEO of Oneprompt and the founder of Current and BlockStudioPhilly. He builds from Philadelphia.

75 WORDS

Neil Rayarao is an 18-year-old founder based in Philadelphia. He is co-founder and CEO of Oneprompt LLC, an AI events and media company; the founder of Current, an AI-powered iOS dashboard for college students; and operates BlockStudioPhilly, a freelance studio rebuilding the website architecture of growing companies. He is a first-year BSBA Management student at Drexel University's LeBow College of Business and Pennoni Honors College.

200 WORDS

Neil Rayarao is an 18-year-old founder building three companies from Philadelphia. He is co-founder and CEO of Oneprompt LLC, an AI-focused events and media company turning the most-hyped technology of the decade into something undergraduates can build with and demo on stage. He is also the founder of Current, an AI-powered iOS dashboard designed to become the home screen for college students, and operates BlockStudioPhilly, a freelance studio rebuilding the website architecture of growing companies — the structural layer beneath the surface that most agencies skip. Neil is a first-year BSBA Management student at Drexel University's LeBow College of Business and a member of the Pennoni Honors College, graduating in 2030. His operating thesis is that AI does not replace people — it replaces hesitation. He works fast, writes directly, and prefers momentum over the perfect plan. When he is not building, he is on a tennis court, playing pickleball, or running the Schuylkill River Trail at sunrise.

03 — THE COMPANIES

Three companies. *One operating system.*

01 Oneprompt

CO-FOUNDER & CEO · FOUNDED 2025

An AI-focused events and media company headquartered in Philadelphia. Oneprompt turns the most-hyped technology of the decade into something undergraduates can actually touch, build with, and demo on stage. A two-member Pennsylvania LLC.

02 Current

FOUNDER · IOS APP FOR COLLEGE STUDENTS

An AI-powered dashboard for the most contested real estate of a student's day: the iPhone home screen. Current unifies calendar, mail, health, and an assistant that understands what 'Tuesday week 7' actually means. Built in SwiftUI. Dark, minimal, fast.

03 BlockStudioPhilly

FREELANCE · WEBSITE ARCHITECTURE REDESIGN

A freelance studio rebuilding the architecture of websites for companies that have outgrown their first iteration. Information hierarchy, navigation, visual language — the structural layer underneath the surface most agencies skip. For operators who treat their site as infrastructure, not decoration.

04 — GET IN TOUCH

Let's talk.
